2

Angle indicator
of backrest position

5

Lever mechanism
for bed positioning

3

The unique system Ergoframe®

The common mattress platform

VARIABLE BED POSITIONING WITH ERGOFRAME®

The Ergoframe® system extends the mattress platform in the pelvic area and reduces the pressure load on the tissues in this region when a patient is positioned in the cardiac chair position.

PRAKTIKA BED IN TWO VERSIONS

New generation of Praktika beds includes Praktika 1 with fixed height of mattress platform. The next version Praktika 2 bed has adjustable height of mattress platform, optionally TR/ATR function and can be centrally braked.

PRACTICAL DETAILS

Locking bed ends

Accessory rail

Protective corner bumpers and additional vertical bumpers

Accessory holder

FOR PATIENT SAFETY

Complete solution of side rails offers individual settings and ensures maximum patient safety.
